PERSONAL PROJECTS

Habit Tracker

- Developed a habit tracker application to help users establish and maintain positive habits by tracking their progress over time. The project aimed to provide a simple and intuitive interface for users to set goals, track their daily activities, and visualise their habit streaks
- **Technologies Used:** HTML, CSS, JavaScript, Node.js, MongoDB

IMDb Clone

- Developed an IMDb clone website aiming to replicate the functionality of the popular movie database platform. The project focused on providing users with a seamless experience for discovering and exploring movies, including details, ratings, and reviews
- **Technologies Used:** HTML, CSS, JavaScript, Node.js, MongoDB, API

CSV File Viewer

- Created a CSV file viewer application to facilitate easy viewing and manipulation of CSV (Comma-Separated Values) files. The project aimed to provide users with a user-friendly interface to open, explore, and analyze CSV data efficiently.
